

# WOODLAND

---

Low-density forest:  
more sunlight  
reaching the  
ground through  
the tree  
canopy

• Understorey of  
shrubs and  
herbaceous plants

Its purpose is to  
give information.  
You read to learn.

the greater the  
animal diversity will  
be: herbivores and  
carnivores.

There are 4 layers:  
canopy,understory,  
field layer and  
ground layer
